Shelf Life Akasel Consumables

To maintain product quality and effectiveness, it is crucial to adhere to the recommended storage conditions and expiration date.

When stored properly, in un-opened containers and/or packaging and under controlled conditions i.e. at room temperature (approximately 21-28°C/ 70-82 °F), out of direct sunlight, preferably in dark room, with an approximate humidity level of 50-80% the suggested shelf life indications are provided below.

Storage should also take into consideration any specific requirements stipulated in the SDS (Safety Data Sheet), under Section 7, "Handling and Storage".

Please refer to the expiration date printed on the product packaging, for applicable products.

For warranty questions please refer to our terms and conditions:
